

TS 2500 Transport System

The 2-in-1 solution: hand truck and push cart

 10 YEARS
GUARANTEE

Properties

- Transport system with 2-in-1 function: flexible use as a hand truck and push cart – ideal for working anywhere in the house and garden
- Quick-folding function for quick conversion
- Folding, durable plastic handles for space-saving storage
- Guard on the handles protects your hands – for safety when manoeuvring
- Compact folded size, ideal for transport even in relatively small car boots
- Easy and comfortable transporting of loads thanks to the pneumatic tyres with all-terrain tread and high-quality steel rims
- Easy regulation of the air pressure with a customary air pump thanks to 90° angle valve
- Ready for immediate use after installation of the handle
- Hand truck function (150 kg load capacity):
 - Back panel for supporting bulky objects
 - Safe transport of bulky, flat and even round objects due to the special shape of the back panel
 - Wide support surface with all-round bar for safe transport, e.g. of Euro boxes (up to max. 400 x 600 mm)
 - Can be used on steps (max. 100 kg) thanks to robust build quality and large pneumatic tyres
 - Swivel joint on the steel frame for quick conversion with additional detent for convenient handling on steps
- Push cart function (200 kg load capacity):
 - Wide support surface with all-round bar for safe transport, e.g. of Euro boxes (up to max. 400 x 600 mm)
 - 2-wheel stand for loading and transporting without tipping over
 - Easy to load due to the low load surface
 - Flexibility due to the folding bucket: folded in for transporting long objects, folded out for stabilising loads

Technical data

Product weight	15.7 kg
Load-bearing capacity of hand truck	150 kg
Load-bearing capacity of push cart	200 kg
Wheel	Pneumatic-tyre wheels
Additional product specification	90° angle valve Foldable base plate
