AMESP1000-MNZ

The AMESP1000-MNZ is Aimtec's highest power AC/DC converter that offers much greater cost effectiveness due to material normalization and production automation also leading to improved reliability and performance. Offering a commercial input voltage range of 90-264VAC(120-370VDC) and an output voltage range from 12-54VDC, this series will offer many benefits to your new system design. This new series offers great operating temperatures, from -30°C to 50°C with full power and also features an isolation of 4000VAC for improved reliability and system safety. Furthermore, a high MTBF of 250,000h, output short circuit protection (OSCP), output over-current protection (OCP), output over-voltage protection (OVP) and over-temperature protection (OTP) come standard with the series. The AMESP1000-MNZ is perfect for street lighting controls, grid power, instrumentation, industrial applications, telecom, and security applications.

Features

- Universal Input: 90 - 264VAC/120 - 370VDC
- Operating Temp: -40 °C to +70 °C
- PFC > 0.95
- High isolation voltage: Up to 4000VAC
- Low ripple & noise, 200mV(p-p) typ.
- Output short circuit, over-current, over-voltage and over temperature protection
- Regulated Output
- The base plate with conformal coating
- Active power factor correction

	Voltage dips, Short Interruptions Immunity	IEC/EN 61000-4-11 0%, 70%, Criteria B
<p>Note: The power supply should be considered as a part of the components in the system. RE performance are been tested on a metal plate with a thickness of 3mm and a length of 450mm \times 450mm. The power supply must be combined with the terminal equipment for electromagnetic compatibility confirmation.</p>		

Functional Specifications				
Parameters	Conditions	Typical	Rated	Units
Remote control	Full input voltage and load range, Power ON	PS_ON (Pin6) and GND (Pin7/14) are short		
	Full input voltage and load range, Power OFF	PS_ON (Pin6) and GND (Pin7/14) are open		
Remote Sense	Total compensate voltage (Vs+/Vs-shortcd to Vo+/VO-respectively)	200		mV
DC_OK signal	Full input voltage and load range, Power ON	> 2.5	5	VDC
	Full input voltage and load range, Power OFF		0.5	VDC
ORing	Support direct parallel use, achieve 3+1 parallel redundancy			
Current sharing accuracy	When units in parallel, each power supply needs to carry a rated load of more than 50%	± 5		%
LED signal	Main output status indication, Normal output	Green LED ON		
	Main output status indication, Abnormal output, Protected	Red LED ON		
	Main output status indication, Power OFF (AC without input)	LED light OFF		
SDA, SCL for I2C	Internal 2.4 k Ω pull-up resistor to internal 3.3 V			
<p>Note: If the product is used in medical equipment, the terminal system should shield the LED signal light to meet the medical certification requirements that operators should not see the indicator light after the product is installed.</p>				

Derating

Note: With an AC input voltage between 90-100VAC and a DC input between 120-140VDC the output power must be derated as per the temperature derating curves.

Note:

1. Unless otherwise specified, parameters in this datasheet were measured under the conditions of $T_a=25^{\circ}\text{C}$, humidity<75%RH with nominal input voltage and rated output load.

2. The ambient temperature derating of 5°C/1000m is needed for operating altitude greater than 2000m.
3. In order to improve the efficiency at high input voltage, there will be audible noise generated, but it does not affect product performance and reliability.
4. The out case needs to be connected to PE of system when the terminal equipment is operating.
5. The output voltage can be adjusted by the ADJ, clockwise to decrease.
6. The power supply is considered a component which will be installed into a terminal equipment. All EMC tests should be confirmed with the final equipment. All EMC tests should be confirmed with the final equipment.
7. In the appearance dimension drawing, $\pm V_o$ represents the main output, $\pm S$ represents the auxiliary output, and the auxiliary output can be selected by the customer, which has no effect on the main output.
