

CD CRIMP TYPE CONNECTOR

General

The model CD connectors are SM Series (sub-miniature) rectangular multi-contact crimping connectors. CD Crimp Type Connectors are Crimp Type D Sub-miniature Connectors for Discrete Wire Terminations.

Available in 9, 15, 25 and 37 way. Terminals available for AWG28 through AWG20. Plug with Grounding dimples is introduced now.

Features

- (1) Compact and sturdy due to metal shell.
- (2) Can be mounted on the front or back of a panel or chassis as necessary.
- (3) Requires no special withdrawal jig (push the retainers from the connector sides to insert/withdraw the connector).
- (4) Uses insulation made from highly heat-resistant and chemical-resistant UL synthetic resin.

Application

Suitable for modems in communications equipment such as computers, peripherals and terminals, control equipment, measuring instruments, and export equipment.

Electrical and Environmental

Electrical and Environmental Characteristics	
Current capacity	3A
Rated voltage	350V AC
Insulation resistance	5000mΩ min. at 500V DC
Contact resistance	25mΩ max. at 100mA DC
Withstand voltage	1250Vrms AC for 1 minute

Material and finish		
Shell	Steel	Nickel plating
Insulator	PBT (GE Valox)*	Black
Contacts	Phosphor bronze	Nickel plating + Gold plating

*UL94V-0

Assembling Procedure of Crimp Contact

Assembly Steps

Procedure for Contact Extraction

In case of extracting a contact from the housing in insertion error or in circuit change, follow the steps as shown below:

(1) How to extract a contact

Insert a 1.1×0.5 mm thick board into the lance-fixed-hole of the housing as shown in Fig. 1 and extract the contact by pulling the wire.

(2) How to raise up a lance

When the extracted contact is installed again in the housing, please raise up the contact lance as shown in Fig. 2 and then insert it to the housing.

Fig. 2

Figure 1 illustrates a female contact. This also applies for a mate contact.
