Surface Mount Switch

## The smallest detection switch in the world. Ideal for miniature mobile devices

(OMRON's data as of June 2014)

- Ultra small size and ultra low profile contributing to down-sizing of sets devices.
$(3.0 \times 3.4 \times 0.9 \mathrm{~mm}(\mathrm{~W} \times \mathrm{D} \times \mathrm{H}))$
- A unique mechanism enables high contact reliability and high precision operation.
- Horizontal 2-way detection and long stroke for easy installation are available.
- Meet a variety of applications by contact and lever variations

## Model Number Legend

## D3SH 1234

1. Contact form

A: SPST-NO
B: SPST-NC
2. Boss of Positioning

0: without Boss
1: with Boss
3. Lever and Direction of Operation $R$ : Right operating standard lever L : Left operating standard lever R1: Right operating long lever L1:Left operating long lever
4. Packaging Specifications

None : 1,000 pcs.
-6 : 6,000 pcs.

Contact Form
-SPST-NO

-SPST-NC

Note: The cover has the same electric potential as the COM terminal.

## List of Models

## -Standard Lever Models

| Contact form | Direction of Operation |  | Boss of Positioning | Model | Minimum packing unit* |
| :---: | :---: | :---: | :---: | :---: | :---: |
| SPST-NO | Right |  | With Boss | D3SH-A1R | 1,000 pcs. |
|  |  |  |  | D3SH-A1R-6 | 6,000 pcs. |
|  |  |  | WithoutBoss | D3SH-A0R | 1,000 pcs. |
|  |  |  |  | D3SH-A0R-6 | 6,000 pcs. |
|  | Left |  | With Boss | D3SH-A1L | 1,000 pcs. |
|  |  |  |  | D3SH-A1L-6 | 6,000 pcs. |
|  |  |  | WithoutBoss | D3SH-A0L | 1,000 pcs. |
|  |  |  |  | D3SH-A0L-6 | 6,000 pcs. |
| SPST-NC | Right |  | With Boss | D3SH-B1R | 1,000 pcs. |
|  |  |  |  | D3SH-B1R-6 | 6,000 pcs. |
|  |  |  | WithoutBoss | D3SH-B0R | 1,000 pcs. |
|  |  |  |  | D3SH-B0R-6 | 6,000 pcs. |
|  | Left |  | With Boss | D3SH-B1L | 1,000 pcs. |
|  |  |  |  | D3SH-B1L-6 | 6,000 pcs. |
|  |  |  | WithoutBoss | D3SH-B0L | 1,000 pcs. |
|  |  |  |  | D3SH-B0L-6 | 6,000 pcs. |

## Contact Specifications

| Contact Specifications | Slide |
| :--- | :---: |
| Minimum applicable load | $15 \mu \mathrm{~A}$ at 3 VDC |

OLong Lever Models

|  |  |  | Without Boss | D3SH-B0L1 | 1,000 pcs. |
|  |  |  |  | D3SH-B0L1-6 | 6,000 pcs. |

* Products are packed with embossed tape.

## Ratings

| Rated voltage | Resistive load |
| :---: | :---: |
| 5 VDC | 1 mA |

Note. The ratings values apply under the following test conditions:
(1) Ambient temperature: $20 \pm 2^{\circ} \mathrm{C}$
(2) Ambient humidity: $65 \pm 5 \%$
(3) Operating frequency: 20 operations $/ \mathrm{min}$

## Characteristics

| Permissible operating speed |  | 1 mm to $300 \mathrm{~mm} / \mathrm{s}$ |
| :---: | :---: | :---: |
| Permissible operating frequency | Mechanical | 60 operations/min |
|  | Electrical | 60 operations/min |
| Insulation resistance |  | $100 \mathrm{M} \Omega \mathrm{min}$. (at 100 VDC with insulation tester) |
| Contact resistance (initial value) |  | $3 \Omega$ max. |
| Dielectric strength | Between terminals of the same polarity | 100 VAC ( $50 / 60 \mathrm{~Hz}$ for 1 min ) |
| Vibration resistance *1 | Malfunction | 10 to $55 \mathrm{~Hz}, 1.5 \mathrm{~mm}$ double amplitude |
| Shock resistance | Durability | $1000 \mathrm{~m} / \mathrm{s}^{2}$ \{approx. 100G\} max. |
|  | Malfunction *1 | $300 \mathrm{~m} / \mathrm{s}^{2}$ \{approx. 30G\} max. |
| Durability *2 | Mechanical | 150,000 operations min. (20 operations/min) |
|  | Electrical | 100,000 operations min. (20 operations/min) |
| Degree of protection |  | IEC IP40 |
| Ambient operating temperature |  | -25 to $+85^{\circ} \mathrm{C}$ (at ambient humidity $60 \%$ max.) (with no icing or condensation) |
| Ambient operating humidity |  | $85 \%$ max. (for +5 to $+35^{\circ} \mathrm{C}$ ) |
| Weight |  | Approx. 0.02 g |

Note: The data given above are initial values.
*1. The given values apply for Total Travel Position. Close or open circuit of the contact is 1 ms max.
*2. For testing conditions, consult your OMRON sales representative.

## Dimensions (Unit: mm) and Operating Characteristics

The $\square$ is replaced with the code for the contact form that you need. See the "List of Models" for available combinations of models.
Standard Lever Models

| Operating Characteristics | Model | D3SH- $\square \square R$ <br> D3SH- $\square \square \mathrm{L}$ |
| :--- | :--- | :--- |
| Operating Force | OF Max. | $0.3 \mathrm{~N}\{31 \mathrm{gf}\}$ |
| Free Position | FP | $5.4 \pm 0.2 \mathrm{~mm}$ |
| Operating Position | OP | $5.0 \pm 0.2 \mathrm{~mm}$ |
| Total Travel Position | TTP | $3.8 \pm 0.15 \mathrm{~mm}$ |

## ORight operating - without Boss

$\xrightarrow[\substack{0.36}]{\substack{0.35}}$

OLeft operating - without Boss D3SH- $\square$ OL

[^0]ORight operating - with Boss D3SH- $\square 1$ R

## -Left operating - with Boss

D3SH- $\square 1 \mathrm{~L}$

PCB mounting hole and pad dimensions (reference) (TOP VIEW)

Note 1. Unless otherwise specified, a tolerance of $\pm 0.15 \mathrm{~mm}$ applies to all dimensions.
Note 2. The operating characteristics are for operation in the A direction $(\downarrow)$ and $B$ direction $(\rightarrow, \leftarrow)$ has the same operation characteristic values as of the $A$ direction.

## Long Lever Models

| Operating Characteristics | Model | D3SH- $\square \square$ R1 <br> D3SH- $\square \square 1$ |
| :--- | :--- | :--- |
| Operating Force | OF Max. | $0.24 \mathrm{~N}\{24 \mathrm{gf}\}$ |
| Free Position | FP | $5.9 \pm 0.3 \mathrm{~mm}$ |
| Operating Position | OP | $5.4 \pm 0.3 \mathrm{~mm}$ |
| Total Travel Position | TTP | $3.8 \pm 0.2 \mathrm{~mm}$ |

Note 1. Unless otherwise specified, a tolerance of $\pm 0.15 \mathrm{~mm}$ applies to all dimensions.
Note 2. The operating characteristics are for operation in the A direction $(\downarrow)$ and $B$ direction $(\rightarrow, \leftarrow)$ has the same operation characteristic values as of the A direction.

-Right operating - with Boss
D3SH- $\square 1$ R1

## OLeft operating - with Boss

## D3SH- $\square 1$ L1

Note 1. Unless otherwise specified, a tolerance of $\pm 0.15 \mathrm{~mm}$ applies to all dimensions.
Note 2. The operating characteristics are for operation in the A direction $(\downarrow)$ and $B$ direction $(\rightarrow, \leftarrow)$ has the same operation characteristic values as of the A direction.

## Packaging Specifications

| Standards | Conforms to JEITA |
| :--- | :--- |
| Package | Qty 1,000 pcs./reel <br> Qty 6,000 pcs./reel |

## Precautions

## $\star$ Please refer to "Common Precautions" for correct use.

Caution

## -Electrical Ratings

- Confirm the contact load in order to select an appropriate switch rating.
- Do not apply an excessive electrical load to the contacts, otherwise the contacts may weld, resulting in a short circuit or burning.

## - Terminal Connection

- Do not use flow soldering or hand soldering to solder terminals.
- Conduct reflow soldering within the range shown in the terminal temperature profile below.
Some reflow soldering devices have extremely high peak values. Do a test in advance to confirm proper soldering conditions.
- Do not conduct reflow soldering more than twice. Also provide a time interval of at least five minutes between the first and second reflow soldering processes to allow the Switch to return to room temperature.
Heating the Switch continuously (without an interval) may cause the edges of the Switch to melt and degrade the characteristics.
- When printing for a cream solder process, a 0.13 mm screen thickness is recommended.
- Be sure to provide local ventilation.

## -Printed Circuit Boards

Special attention must be paid to the handling of printed circuit boards after a Switch has been mounted onto them. Airborne PCB particles may penetrate the interior of the Switch when printed circuit boards are separated by cutting. Also, do not stack printed circuit boards that have Switches mounted on them.

## -Product Specification Details

- This document provides only a partial list of specifications. It is recommended that you request complete drawings and specifications prior to purchasing or using the product.

| Correct Use |
| :--- |
| OMounting |

## -Mounting

- The cover has the same electric potential as the COM terminal. Do not short-circuit the cover with a NO or NC terminal when mounting the cover.

- Be careful of the following points. Incorrect handling may lead to insufficient actuator return, Switch damage, or reduced durability.
- Set the operating body in line with the direction of the actuator movement, and make sure that the operating body is completely separate from the actuator when the Switch is in the free position (FP). When the actuator is operated from the crosswise direction of the Switch, make sure that the corner of the operating body has a minimum radius of R1.

- Set the Switch stroke to $70 \%$ to $100 \%$ of the overtravel (the difference between the operating position and the total travel position).
- Do not subject the Switch to operations that involve strong impact.
- Do not use the Switch as a stopper.
- Do not apply excessive loads to the cover or operate the actuator from a direction other than a specified operating direction.
- Do not use an adhesive to secure the Switch.
- A lubricant is used in the Switch. Some of the lubricant may seep out because the Switch does not have an airtight construction. Consider this possibility with respect to the usage conditions when designing or using the Switch.

## -Application Environment

Do not use the Switch in locations that are subject to toxic gas, silicon, excessive dust, excessive dirt, high temperatures, high humidity, sudden temperature changes, water splashes, or oil splashes.
Otherwise, damage resulting by faulty contact of the Switch contacts, corrosion, or other causes, or other functional faults may occur.

## OInsulation and Wiring

Be sure that the installation conditions provide a sufficient insulation distance between Switch terminals and other metal parts, lands, etc.

## -Cleaning

The Switch does not have an airtight construction, and it must not be cleaned with cleaning fluids. Malfunctions may occur if the cleaning fluid penetrates the interior of the Switch together with flux or foreign matter from the surface of the PCB.

## -Confirmation with Actual Equipment

Be sure to confirm the quality of the product under the load and environmental conditions that will be used during actual applications.
