MESTO Centennial

a Swabian Story of Success

1919 – How it all began:

Founded as the Engineering Company Karl & Ernst Stockburger in Heutigsheim.

1923: Production of ashtrays, smoking sets, desk sets, and metal goods

1928: Production launch of plant protection equipment. The MESTO plunger pump proved to be very efficient and economical which justified mass production.

1930: Production of the IDEAL nebulizer

The 50s and 60s

Manufacture of hand-powered pesticide sprayers. Originally made of brass; later steel and stainless steel devices were added. Successive expansion of assortment and application for home, garden, construction and other professional use.

The MESTO catalog in the course of time:

The 70s and 80s

The era of plastic pressure sprayers began. MESTO is trendsetter in the development of economic alternative devices for home and garden.
MESTO's new annex with assembly hall and small-parts warehouse.

1985: approx. 90 employees 30 of whom are staff members. MESTO exports to about 70 countries – sales and service via representatives and authorized distributors.
1986: The pressure sprayer PICO is the first device with a container consisting of 3 individual parts. MESTO anticipates new technologies far in advance.

MESTO today – Superior technology – convincing quality

It is our primary objective to distribute fluids resourcefully and environmentally safe in farming, construction, cleaning as well as numerous other sectors.

The components of our products are designed ergonomically for comfortable use. Our devices are efficient and reliable. The aesthetic design evolves with customer demands, applications and innovations over time. We, therefore, guarantee the supply of spare-parts for 20 years upon purchase. With production in Germany and 100 years of experience, we guarantee highest quality as certified according to DIN EN ISO 9001:2015.

These are the portable MESTO sprayers

Your Bernd Stockburger,
Managing Director MESTO

For home and garden and professional use – with MESTO plants keep growing

Perfect comfort for your garden: 3275M

NEW!

Ergonomically designed shut-off valve with filter and manometer

Piston gauge with built-in safety valve

Functionally reliable spray wand holder

Spray wand, brass, 40 cm, 360° adjustable with brass hollow cone nozzle

Spiral hose, length 250 cm

Plastic pump with ergonomic pump handle

Integrated filling funnel

Practical wall bracket included

Service voucher included

Large base: Safe stand even on uneven surfaces

Stable foot ring for a sturdy foothold

Available as option:
padded carrying backpack straps (7121M)
transport trolley (3960D)
compressed air-filler-valve (6209NA and 6209NB)

The respect for nature and the love of beautiful and healthy plants – these are good reasons to use a MESTO sprayer. All products are specially developed for modern plant protection with the guarantee that liquids are sprayed efficiently and economically. Through high-class materials and technically advanced processes, our sprayers have become longlasting, high quality products – also ideal for professional applications. From the trigger sprayer for domestic use to the professional backpack model – MESTO offers a full spectrum clearly structured, easy to comprehend and tailored to the specific needs for various areas of application.

Compression sprayers (3 bar /44 psi)

Plant protection, weed control,
flower care, liquid fertilizing

MESTO hose attachment – for quick and easy assembly
The new ideas for convenient and safe hose attachment:

3230R/3232R: Simple access, excellent grip of the nut and optimized screw thread make it easy to attach the hose

3232/3232U: With the unique MESTO telescopic nut, attaching the hose is child's play. It fits perfectly when inserted.

Filter to avoid the nozzle from clogging Shut-off valve with an ergonomic design

The ergonomic form ensures work without effort. Convenient adjustment of nozzle for precise and comfortable spraying

Display pallet 3230D

Display pallet 3232D

You will find accessories, e.g. extension wands, spray shields as of page 30ff.

Spraying is the economic alternative – MESTO understands your trade

Compression sprayers 3598P/3618P

Comfortable filling through an extra large, separate opening

Clean and efficient – this is how you work with MESTO when you want a fine distribution of liquids. Our product solutions are as diverse and individual as the various tasks you have to deal with. Efficient use of liquids through perfectly designed sprayers and product development in close cooperation with the customer – full-filling special requirements – this convinces more and more users.

Handcraft:

- ◆ For painters spraying on wallpaper stripper
- ◆ Distribution of primer such as penetrating primer or etch primer
- ◆ Extraction of liquids with MESTO SAUGFIX

Construction:

- ◆ Spraying of concrete releasing agents, impregnation and other construction chemicals
- ◆ Cooling and rinsing of drill bits
- ◆ Binding of dust during cut-off grinding

Cleaning:

- ◆ Application of all types of cleaning agents and disinfectants
- ◆ Cleaning vehicles, motorcycles and bicycles
- ◆ Distribution of foaming cleaning agents

Hygiene:

- ◆ Pest control
- ◆ Epidemic prevention

Wood working:

- ◆ Distribution of wood preservatives
- ◆ Application of glaze

Traffic:

- ◆ Lubrication of railroad switches
- ◆ Cleaning trucks
- ◆ Engine compartment preservation
- ◆ Corrosion protection

Agriculture and forestry:

- ◆ Plant protection
- ◆ Weed control
- ◆ Spraying to prevent browsing animals
- ◆ Disinfection of stables
- ◆ Control of epidemics

NEW!

An additional convenience: Pressure releases automatically when the lid of the extra large, separate filling hole is opened. Easy to fill, without spilling valuable liquid, therefore, avoiding any contamination of the area.

Spiral hose, length 250 cm for large range

Professional pump made from brass with big handle for convenient pumping and carrying

Ergonomically formed shut-off valve with filter

Comfortable filling through an extra large, separate opening

Functional reliable spray wand holder

Stainless steel tank extremely robust even under toughest conditions (6 l or 10 l contents)

Spray wand, brass, 50 cm, 360° adjustable

Safety interlock for hose: for long lasting connection

Brass flat jet nozzle 80-01E with fine filter, for a fine and economically distribution of liquids.

Stable foot ring for a sturdy foothold

Large base: stable stand even on uneven surfaces

Clever Ideas – More Performance

MESTO makes more out of your sprayer

A well coordinated range of accessories for different applications and a wide range of spare parts and nozzles make the MESTO sprayer an economic, durable and versatile acquisition. MESTO quality products are, therefore, not only diligent assistants used by professionals and amateurs alike, but also reliable long-term companions.

Accessories at a Glance

Get an general picture of all accessories. On pages 44 - 47 you will find a list of spare parts and accessories corresponding to the various sprayers. These lists are available as service cards to support our dealers quickly and reliably when questions arise. To support our dealers, we are also pleased to provide these charts as service cards for the point of sale so that you can answer all end-customer questions quickly and reliably.

20 Years Supply of Spare Parts

MESTO sprayers are worthwhile investments because all spare parts of newly purchased products will be available for 20 years. The sprayer can, therefore, be upgraded or converted at any time – definitely a strong sales argument. Our service team is always on hand to assist with this.

Self-service package with accessories and spare parts

First-Aid kit

Compressed air-filler valves

With the support of these air-filler valves, MESTO sprayers can be connected to a compressor and subsequently pressurized with compressed air. No manual pumping necessary.

MESTO equips all compressed air-filler valves with a pressure-relief for your safety.

Two versions for all executions are available. They differ depending on the attachment to the pressure line: A = Tire valve connection B = Plug-in coupling NW 7.2

Accessories

Filler screen, wide spray wand, spray shield
tong nozzle, protective clothing, dosing set

6122

Filler screen	6122	Large-surface filling screen for pre-filtering self-prepared organic mixtures. For compression sprayer 3270, as well as compression sprayers 3585G, 3615G
Diameter	120 mm	
Weight	40 g	
GTIN	40 00903 61220 7	

3720

Wide spray wand	3720	Recommended distance to ground 30 - 35 cm for even application of the spray pattern on a strip 150 cm wide.
Width of the wand	100 cm	
Material	Brass	
Nozzle equipment	3 flat jet nozzles 1422	
Nozzle distance	50 cm	
Packaging	Cardboard tube	
Packing unit	1 piece	
GTIN	40 00903 37200 2	

3914D

Spray shield	3914D	3916	Spray shield made of particularly light, but impact resistant plastic. Targeted, economical spraying in the garden. 3914D with pre-lug.
Material	Plastic, transparent	Plastic, transparent	
Weight	160 g	96 g	
Width	30 cm	17.5 cm	Suitable for all MESTO sprayers from 3.0 l filling content.
Nozzle equipment	Flat jet 80-015	without nozzle	
Spraying width	12 - 30 cm, adjustable by turning spray screen and nozzle		
Packing unit	3 pieces	1 piece	
GTIN	40 00903 39140 9	40 00903 39160 7	

3778

Tong nozzle	3778	For bark beetle control and under-leaf treatment in row cultures.
Material	Brass	
Weight	165 g	
Nozzle equipment	2 hollow cone nozzles 1302/1301	Nozzle angle continuously infinitely variable by bending
Packing unit	1 piece	
GTIN	40 00903 37780 9	

2110G

Protective clothing	3923	Protects people and clothing when spraying agents for plant protection and care.
Content	Protective overall with hood Protective gloves Protective face mask	
Weight	170 g	
Individual packaging	Printed plastic carrier bag 24 x 6 x 35 cm	
Packing unit	5 pieces	
GTIN	40 00903 39230 7	

Protective mask	2110 G	
Content	Protective mask	CE
Weight	220 g

3654E	 plastic, 48 cm, EPDM, with MESTO-flat jet nozzle 1428P (90-02), PVDF	foil bag	40 00903 36650 6

Extension wands			
An extension wand is recommended particularly for high trees and shrubs, for efficient and economical treatment of all parts of the crown. Important: The longer the extension wand, the higher the pressure reserve of a sprayer should be. The pressure reserve results from the operating pressure and the size of the pressure chamber above the intended filling content of the tank.

Sprayer glossary

Tank		Plastic tank	Tank made of high-quality polyethylene. Especially resistant to acids and bases.
		Steel tank	Steel tank with anti-corrosive coating. Especially robust and durable. Not suitable for aggressive liquids.
		Stainless steel tank	Tank made of high-quality, stainless steel. Especially robust and durable.
Safety		Pressure gauges	Measuring device to record and indicate the physical pressure of a medium (liquid, gas) in the tank and the spray line.
		Safety valves	Safety valves protect pressurized tanks against unauthorized excessive pressure which may damage the device. Safety valves relieve the pressure by discharging gases into the atmosphere.
		Constant Flow Valve (CFV)	Provides for steady consistent pressure and guarantees even and economic application.
Materials		NBR = Nitrile-rubber	NBR is made of synthetic rubber. Its high elasticity makes it suitable for the production of seals and O-rings. It is highly resistant to oils, greases and hydrocarbons and has a favorable aging behavior as well as low wear.
		FPM = Fluoro-rubber	FPM is made of synthetic rubber. Its high elasticity makes it suitable for the production of seals and O-rings. It is highly resistant to hydrocarbons, oils, strong acids, aromatic and chlorinated solvents and has a high temperature resistance.
		EPDM = Ethylen-Propylen-Dien-rubber	EPDM is a terpolymer elastomer (rubber). Its high elasticity makes it suitable for the production of seals and O-rings. It is resistant to solvents and is considerably resistant to bases. In general not suitable for hydrocarbon-based oils and fuels.
		PA = Polyamides	Polyamides are polymers and significant for their high strength, rigidity and durability. They are highly resistant to chemicals and are easy to process.
		PE = Polyethylene	Polyethylenes are polymers and significant for their high strength, rigidity, durability and breaking elongation. They are resistant to almost all polar solvents, acids, bases, water, alcohols, oils. PE-HD also gasoline.
		PP = Polypropylene	Polypropylenes are polymers and are significant for their higher rigidity, hardness and strength than polyethylene but lower than polyamide. They are resistant to almost all organic solvents and greases as well as to most acids and bases.
Standards		CE mark (Conformité Européenne)	CE means "complies with EU Directives" This label identifies certain products associated with product safety according to EU law. The manufacturer thus confirms that the product complies with the applicable European Directives.
		TÜV-GS Intertek-GS	The GS mark certifies that a product complies with the requirements of the Equipment and Product Safety Act (GPSG) specified e.g. in safety regulations of the employers' liability insurance associations, DIN and EN standards or other generally acknowledged rules of technology.

Requirements for the use of sprayers

Maximum working temperature (liquid temperature):

Plastic devices 30 °C or 40 °C, Devices with metal tank 50 °C

not suitable for flammable liquids

Viscosity of liquids:

Up to approximately 1.5 times more viscous than water. Where larger drops and a reduced spray angle of the nozzle are acceptable, the viscosity may also be considerably higher.

Viscosity testing device

Safety information

Use of inappropriate substances may result in serious injuries and environmental damage. Always heed the information in the section "Usage" in the operating manual as well as the information provided by the supplier of the substance to be sprayed.

Send us a safety data sheet (MSDS) of the product you want to use and we will recommend the right sprayer for you.

Store Shelf and Display Pallets as Eye-Catchers

Benefit from our many years of experience with assortment presentations, design, self-service packages with spare parts, individual assembly suggestions or eye-catching displays. We can easily create "fast-seller" displays that ensure a high stock turnover because the customer can find the correct product at a glance.

The attractive MESTO brandname packaging also provides detailed information on the products and their execution.

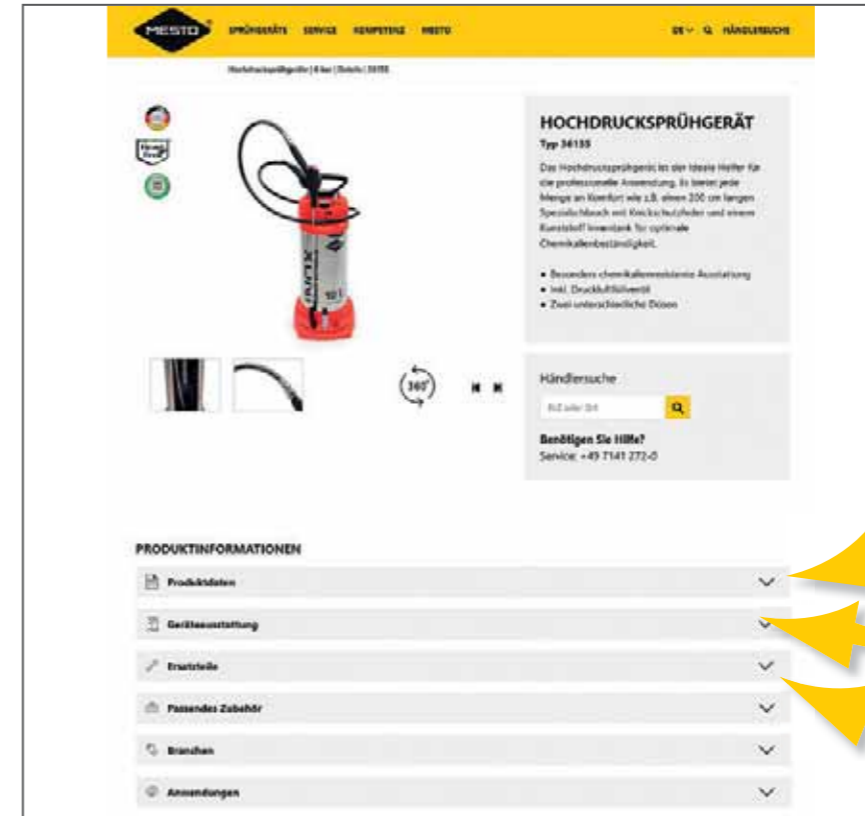

Scanner strips for shelves

Just one click will take you one step further: www.mesto.de

All news regarding the MESTO world can be found on our extensive website – upcoming trade fair dates and latest product information. Local dealers are listed in a geographical database. Whatever the requirement, we offer maximum service – even on the internet.

Strong Service

Our service team out on the field and at the head office in Freiberg am Neckar is always on hand to answer all your questions about our product range. If something is missing in our catalog or if you have an idea you would like to discuss, please do not hesitate to contact us.

Your feedback is important. If you are not entirely satisfied, please let us know so that we can take appropriate action. Therefore, we thank you in advance for your opinion on our products and service and for your call at +49 (0)7141-272-0 or info@mesto.de.

Which sprayer is the right one? – Criteria to help you choose:

Garden size:

To avoid the need of frequent refilling, you should choose the right device size. If in doubt, always select the larger device as this can be used for spraying smaller quantities without difficulty.

Reference values for required spray mixture:

Ground cultures	0.2 - 0.3 l for 10 sqm
Low shrubs (e.g. roses)	0.8 - 1.3 l for 10 sqm
Espalier trees, spindle shrubs	0.5 - 1.0 l per piece
Larger bush trees	2.0 l per piece
Older, free-standing trees	3.0 - 5.0 l per piece

Plant height:

Using extension wands, also higher plants can be sprayed easily. The longer the extension wand, the higher the pressure of the device should be.

Reference value for range:

Compression sprayers	6 m
Compression sprayers 3270, 3275M	5 m
3232, 3237	4 m
3230R, 3232	3 m
Backpack sprayers 3552, 3558, 3541G	3 m
Trigger sprayers, compression sprayers	1.5 m

Frequency of use:

The more often you use the device, the better its quality should be. When choosing your device, please do not hesitate to contact one of our agents or a MESTO customer consultant.

Choose the right sprayer for your area of application:

Trigger sprayers, compression sprayers and garden sprayers of 0.5 - 1.5 l:
Light and handy for smaller home gardens with surface area of 10 - 40 sqm and for balcony plants not higher than 1.5 m.

Compression sprayers of 3.0 - 10.0 l (3 bar/44 psi):

For smaller to medium-sized home gardens with an area of 10 – 200 sqm. Well suitable for the use of extension wands.

Compression sprayers of 5.0 - 10.0 l (6 bar/88 psi):

For large home gardens, for the treatment of high trees and shrubs. Particularly suitable when using extension wands.

Backpack sprayers of 12.0 - 18.0 l:

are particularly suitable for surface area and strip treatment in low to semi-high cultures thanks to even spraying pressure and the large liquid reservoir.

Safety Information:

Use of inappropriate substances may result in serious injuries and environmental damage. Always heed the information in the section "Usage" in the operating manual as well as the information provided by the supplier of the substance to be sprayed.
 ● = Recommended use; check carefully beforehand whether the material is resistant to the liquids to be used.
 Send us a safety data sheet (MSDS) of the product you want to use and we will recommend the right sprayer for you.
