NC5FXX-B

5 pole female cable connector with black metal housing and gold contacts.

The next generation of the worldwide accepted standard of XLR cable connectors. The successor of the X series offers several new features which make it more reliable, easier to assemble and improves contact integrity as well cable strain relief.

Features & Benefits

• Unique cage design of female contact for low contact resistance and high integrity	• Female contact incorporates a solder barrier to prevent solder running into the contact mating area
• Female connector with improved solid metal latch which is larger and easier to handle	• Additional ground spring contacts for better shell ground continuity
• Improved chuck type strain relief provides higher pull- out force and makes assembly easier and faster	• Boot with polyurethane gland gives high protection to cable bending stresses
Colored rings and boots available for coding or identification	• Sleek and ergonomic design - valuable and handy
Rugged zinc diecast shell, longlasting and dependable	 Internal thread on shell is well protected against any damage
