Save space by connecting with these multi-tier terminals with PUSH IN connection technology.

The product line includes the four-channel, eight-channel and also the innovative sixteen-channel feed-through terminal blocks. The four-channel and eight-channel terminals are also available as potential distribution terminals.

The benefits:

- More than 1700 signals per metre can be distributed with the 16-channel terminal block.
- Red and white actuators make it easier to assign wires to their terminal points.
- The PUSH IN connections make wiring quick and convenient.

WS markers are the perfect match for the W-series connectors. Thanks to their system compatibility, the WS tags can also be used with the I-series and the Z-series. The large marking surfaces do not only permit long character strings but also multi-line text. WS markers are ideal for labels with long, customised character strings. Thanks to the proven MultiCard format, printing with laser printer, PrintJet ADVANCED, plotter or MC-Mobilo is possible.

- Can be fitted in strips or individually
- Markers in proven MultiCard format

Accessories
Marker holders for patch distributors and potential distributors

The accessories of the other ranges of modular terminals can also be used for the P-Series in order to reduce the number of variations. The accessories render possible appropriate solutions for all - even non-standard - tasks. The accessories must comply with the same quality standards as the modular terminals themselves.

Partition plates for PRV/PPV 8

The partitions for the patch and potential distributors provide a visual barrier for separating functional sections.

The printed versions of the partitions make it easy to quickly identify individual terminal points. This simplifies your work when carrying out maintenance or add-ons.

The printed and unprinted partitions are available for the four-level, eight-level and sixteen-level patch distributors and potential distributors.
